

**INTERNATIONAL CONFERENCE ON DOCUMENT ANALYSIS & RECOGNITION**

**SAN JOSE, CALIFORNIA, USA**

## Message from the General Chairs

We are delighted to welcome you all to ICDAR 2023, the 17th IAPR International Conference on Document Analysis and Recognition, at San Jose, in the heart of Silicon Valley in the United States. With the worst of the pandemic behind us, we hoped that ICDAR 2023 would be a fully in-person event. However, challenges such as difficulties in obtaining visas have also necessitated the partial use of hybrid technologies for ICDAR 2023. The oral papers being presented remotely will be synchronous to ensure that conference attendees interact live with the presenters and the limited hybridization will result in an enjoyable conference with fruitful interactions.

ICDAR 2023 is the 17th edition of a long-standing conference series sponsored by the International Association of Pattern Recognition (IAPR). It is the premier international event for scientists and practitioners in document analysis and recognition. This field continues to play an important role in transitioning to digital documents. The IAPR-TC 10/11 technical committees endorse the conference. The very first ICDAR was held in St Malo, France in 1991, followed by Tsukuba, Japan ('93), Montreal, Canada ('95), Ulm, Germany ('97), Bangalore, India ('99), Seattle, USA ('01), Edinburgh, UK ('03), Seoul, South Korea ('05), Curitiba, Brazil ('07), Barcelona, Spain ('09), Beijing, China ('11), Washington DC, USA ('13), Nancy, France ('15), Kyoto, Japan ('17), Sydney, Australia ('19) and Lausanne, Switzerland ('21).

Keeping with its tradition from past years, ICDAR 2023 features a three-day main conference, including several competitions to challenge the field and a post-conference slate of workshops, tutorials, and a doctoral consortium. The conference is being held at the San Jose Marriott from August 21-23, 2023, and the post-conference tracks at Adobe World Headquarters in San Jose from August 24-26, 2023.

We thank our executive co-chairs, Venu Govindaraju and Tong Sun, for their support and valuable advice in organizing the conference. We are particularly grateful to Tong for her efforts in facilitating the organization of the post-conference in Adobe Headquarters and for Adobe's generous sponsorship. The highlights of the conference include keynote talks by distinguished speakers Marti Hearst, Professor and Interim Dean of the UC Berkeley School of Information; Vlad Morariu, Senior Research Scientist at Adobe Research, and Seiichi Uchida, Distinguished Professor and Senior Vice President, Kyushu University, Japan.

A total of 316 papers were submitted to the main conference (plus 33 papers to the ICDAR-IJDAR journal track), with 53 papers accepted for oral presentation (plus 13 IJDAR track papers) and 101 for poster presentation. We would like to express our deepest gratitude to our Program Committee Chairs, featuring three distinguished researchers from academia, Gernot A. Fink, Koichi Kise, and Richard Zanibbi, and one from industry, Rajiv Jain, who have done a phenomenal job in overseeing a comprehensive reviewing process and who have worked tirelessly to put together a very thoughtful and interesting technical program for the main conference. We are also very grateful to the members of the Program Committee for their high-quality peer reviews. Thank you to our competition chairs, Kenny Davila, Chris Tensmeyer, and Dimosthenis Karatzas, for overseeing the competitions.

The post-conference features 8 excellent workshops, four value-filled tutorials, and the doctoral consortium. We would like to thank Mickael Coustaty and Alicia Fornes, the workshop chairs; Elisa Barney-Smith and Laurence Likforman-Sulem, the tutorial chairs; and Jean-Christophe Burie and Andreas Fischer, the doctoral consortium chairs; for their efforts in putting together a wonderful post-conference program.

We would like to thank and acknowledge the hard work put in by our Publication Chairs, Anurag Bhardwaj, and Utkarsh Porwal, who have worked diligently to compile the camera-ready versions of all the papers and organize the conference proceedings with Springer. Many thanks are also due to our sponsorship, awards, industry, posters, and publicity chairs for their support of the conference.

The organization of this conference was only possible with the tireless behind-the-scenes contributions of our webmaster and tech wizard, Edward Sobczak, and our secretariat, ably managed by Carol Doermann. We convey our heartfelt appreciation for their efforts.

Finally, we would like to thank the support of our many financial sponsors and you, the conference attendees and authors, for helping make this conference a success. We sincerely wish you an enjoyable conference, a wonderful stay in San Jose, and fruitful academic exchanges with your colleagues.

## Foreword from the PC Chairs

Welcome to the proceedings of the 17th International Conference on Document Analysis and Recognition (ICDAR) 2023. ICDAR is the premier international event for scientists and practitioners involved in document analysis and recognition.

This year, we received 316 conference paper submissions with authors from 42 different countries. In order to create a high-quality scientific program for the conference, we recruited 211 regular and 38 senior program committee (PC) members. Regular PC members provided a total of 913 reviews for the submitted papers (an average of 2.89 per paper). Senior PC members who oversaw the review phase for typically 8 submissions took care of consolidating reviews and suggested paper decisions in their meta-reviews. Based on the information provided in both the reviews and the prepared meta-reviews we PC Chairs then selected 155 submissions (49.1%) for inclusion into the scientific program of ICDAR 2023. From the accepted papers, 55 were selected for oral presentation, and 100 for poster presentation.

In addition to the papers submitted directly to ICDAR 2023, we continued the tradition of teaming up with the International Journal of Document Analysis and Recognition (IJDAR) and organized a special journal track. The journal track submissions underwent the same rigorous review process as regular IJDAR submissions. The ICDAR PC Chairs served as Guest Editors and oversaw the review process. From the 33 manuscripts submitted to the journal track, 13 were accepted and were published in a Special Issue of IJDAR entitled “Advanced Topics of Document Analysis and Recognition.” In addition, all papers accepted in the journal track were included as oral presentations in the conference program.

A very prominent topic represented in both the submissions from the journal track as well as in the direct submissions to ICDAR 2023 was handwriting recognition. Therefore, we organized a Special Track on Frontiers in Handwriting Recognition. This also served to keep alive the tradition of the International Conference on Frontiers in Handwriting Recognition

(ICFHR) that the TC-11 community decided to no longer organize as an independent conference during ICFHR 2022 held in Hyderabad, India. The handwriting track included oral sessions covering handwriting recognition for historical documents, synthesis of handwritten documents, as well as a subsection of one of the poster sessions. Additional presentation tracks at ICDAR 2023 featured Graphics Recognition, Natural Language Processing for Documents (D-NLP), Applications (including for medical, legal, and business documents), additional Document Analysis and Recognition topics (DAR), and a session highlighting featured competitions that were run for ICDAR 2023 (Competitions). Two poster presentation sessions were held at ICDAR 2023.

As ICDAR 2023 was held with in-person attendance, all papers were presented by their authors during the conference. Exceptions were only made for authors that could not attend the conference for unavoidable reasons. Such oral presentations were then provided by synchronous video presentations. Posters of authors that could not attend were presented by recorded teaser videos, in addition to the physical posters.

Three keynote talks were given by Marti Hearst (UC Berkeley), Vlad Morariu (Adobe Research), and Seichi Uchida (Kyushu University). We thank them for the valuable insights and inspiration that their talks provided for participants.

Finally, we would like to thank everyone that contributed to the preparation of the scientific program of ICDAR 2023, namely the authors of the scientific papers submitted to the journal track and directly to the conference, reviewers for journal-track papers, and both our regular and senior PC members. We also thank Ed Sobczak for helping with the conference web pages, and the ICDAR 2023 Publications Chairs Anurag Bharadwaj and Utkarsh Porwal, who oversaw the creation of this proceedings.

## **Vlad Morariu, Adobe Research**

Tuesday, August 22nd, 2023 – 1:30-2:30pm

Vlad Morariu is a senior research scientist with Adobe Research and is part of the Document Intelligence Lab (DIL). His research interests include combining computer vision, natural language, machine learning, and artificial intelligence techniques to develop rich visual and linguistic models for multimodal structured content. His current focus is to develop such models to power the next generation of document consumption and authoring experiences. Vlad received the BS and MS degrees from the Pennsylvania State University, in 2005, with Professor Octavia I. Camps as his thesis advisor. He received the PhD degree from the University of Maryland, in 2010, with Professor Larry S. Davis as his advisor. After completing his doctoral studies, he continued as a postdoctoral researcher and then as a research scientist at the University of Maryland until 2018, when he joined Adobe Research. He has co-authored more than 60 peer-reviewed publications including more than 30 in top-tier conferences (ICCV, CVPR, ECCV, NeurIPS, AAAI, EMNLP, ACL, NAACL). He served as area chair for WACV 2017, 2020-2023 and he served as program committee member for many computer vision and AI conferences, including Computer Vision and Pattern Recognition, ICCV, ECCV, AAAI, and IJCAI. He is currently an associate editor of IEEE Transactions on Pattern Analysis and Machine Intelligence (TPAMI) and is currently serving as program chair for WACV 2024.

## **Seiichi Uchida, Kyushu University**

Wednesday, August 23rd, 2023 – 1:30-2:30pm

### **What Are Letters?**

We DAR researchers have been working on recognizing, understanding, and generating characters. In particular, we have dramatically improved the accuracy of recognition and generation with recent machine-learning techniques. Through those improvements, we can now detect and recognize scene texts and generate a variety of fonts. On the other hand, how much do we know about letters themselves? What is 'A'? How is the alphabet constructed? Why are there so many different fonts? In this talk, I would like to introduce some research results and open problems related to these questions. Prof. Uchida received B.E. and M.E., and Dr. Eng. degrees from Kyushu University, Japan, in 1990, 1992, and 1999, respectively. He is currently Senior Vice President and Distinguished Professor at Kyushu University. He was Co-Program Chair for ICDAR 2021, DAS 2012, and 2022.
