

# RRPR 2022: Fourth Workshop on Reproducible Research in Pattern Recognition

B. Kerautret<sup>1</sup>; M. Colom<sup>2</sup>; A. Krähenbühl<sup>3</sup>; D. Lopresti<sup>4</sup>; P. Monasse<sup>5</sup>; B. Perret<sup>6</sup>; H. Talbot<sup>7</sup>;  
B. Yildiz<sup>8</sup>

RRPR 2022, Montréal Canada, 21 August 2022

<sup>1</sup>LIRIS, University of Lyon 2, France

<sup>2</sup>Centre Borelli, ENS Paris-Saclay

<sup>3</sup>Cube, University of Strasbourg

<sup>4</sup>Lehigh University, Bethlehem, PA 18015

<sup>5</sup>LIGM, École des Ponts Paris

<sup>6</sup>LIGM, ESIEE Paris - Université Gustave Eiffel, Paris

<sup>7</sup>Center for Numerical Vision, CentraleSupélec, Paris <sup>8</sup>Delft University of Technology, Delft, The Netherlands

## Overview of the program: first part

---

09:00 - 09:05	Workshop Opening
09:05 - 09:30	<b>Keynote 1:</b> The Fuzzy Boundaries of Reproducibility - <a href="#">Daniel Lopresti</a> - <a href="#">Lehigh University, Bethlehem PA 18015, USA</a>
09:30 - 10:50	Short Companion paper - <a href="#">Miguel Colom</a>
09:30 - 09:50	On Challenging Aspects of Reproducibility in Deep Anomaly Detection - <a href="#">Konstantin Kirchheim</a> , Otto-von-Guericke-Universitat
09:50 - 10:10	A novel pattern-based edit distance for automatic log parsing: Implementation and reproducibility notes - <a href="#">Maxime Raynal</a> - Nokia Bell Labs - <a href="#">LIG/MRIM</a>
10:10 - 10:30	On the implementation of baselines and Lightweight Conditional Model Extrapolation (LIMES) for class. prior shift - <a href="#">Paulina Tomaszewska</a> - Warsaw University of Technology ( <a href="#">distant</a> )
10:30 - 10:50	Companion Paper: Deep Saliency Map Generators for Multispectral Video Classification <a href="#">Jens Bayer</a> Fraunhofer IOSB
10:50 - 11:05	Coffee break

---

## Overview of the program: second part

---

11:05 - 11:25	<b>RR Results:</b> Special Track Deep Learning <a href="#">B. Kerautret</a>
11:05 - 11:25	Enhancing GNN feature modeling for document information extraction using transformers <a href="#">Mouad Hamri</a> University of Haute-Alsace
11:25 - 11:50	RR Presentations - <a href="#">Daniel Lopresti</a>
11:25 - 11:50	Development Efforts for Replicable Research: Feedback Experience and Perspectives - <a href="#">Miguel Colom</a> Centre Borelli, École Normale Supérieure Paris-Saclay, <a href="#">Bertrand Kerautret</a> - Université Lumière - Lyon 2
11:50 - 13:05	<b>Reproducible Research Discussions</b> - <a href="#">Daniel Lopresti</a>
11:50 - 12h50	Group discussions on Reproducible Research
12:50 - 13:05	Back report of RR discussions

---

closing workshop

---

## Outline:

(1) Identify possible topics for the discussion groups.

⇒ Make suggestions:

[https://semestriel.framapad.org/p/rrpr\\_discuss-9w0r](https://semestriel.framapad.org/p/rrpr_discuss-9w0r)

## Outline:

- (1) Identify possible topics for the discussion groups.  
⇒ Make suggestions:  
[https://semestriel.framapad.org/p/rrpr\\_discuss-9w0r](https://semestriel.framapad.org/p/rrpr_discuss-9w0r)
- (2) Determine which people will participate in which groups (this might result in some groups being split, if they are too big, or merged, if they are too small). It's best if groups have 4-8 people in them. So we need enough topics to support that.  
⇒ can be chosen during coffee break

### Outline:

- (2) Determine which people will participate in which groups (this might result in some groups being split, if they are too big, or merged, if they are too small). It's best if groups have 4-8 people in them. So we need enough topics to support that.  
⇒ can be chosen during coffee break
- (3) Time for discussion, with one person in each group designated as the "scribe" to write notes, and to report back at the end. This person will also have their name appear in the final report on the website, so it's a nice job for a student or a junior researcher.

### Outline:

- (1) Identify possible topics for the discussion groups.  
⇒ Make suggestions:  
[https://semestri.el.framapad.org/p/rrpr\\_discuss-9w0r](https://semestri.el.framapad.org/p/rrpr_discuss-9w0r)
- (2) Determine which people will participate in which groups (this might result in some groups being split, if they are too big, or merged, if they are too small). It's best if groups have 4-8 people in them. So we need enough topics to support that.

- (3) Time for discussion, with one person in each group designated as the "scribe" to write notes, and to report back at the end. This person will also have their name appear in the final report on the website, so it's a nice job for a student or a junior researcher.
- (4) Have some good notes by the end of the workshop, and a plan to finish the report for the website within the next few weeks (by Sept. 30?).<sup>1</sup>

### Highlight the reproducible aspects of PR works:

- a proof that the same results are obtained from the forked code,
- same code version as the paper's,
- simplify comparisons with a given work.

### Highlight the reproducible aspects of PR works:

- a proof that the same results are obtained from the forked code,
- same code version as the paper's,
- simplify comparisons with a given work.
- Coordination with [ReproducedPapers.org](https://reproducedpapers.org).

## Reproducible Label: chaired by **Adrien Krähenbühl**

### Highlight the reproducible aspects of PR works:

- a proof that the same results are obtained from the forked code,
- same code version as the paper's,
- simplify comparisons with a given work.
- Coordination with [ReproducedPapers.org](https://reproducedpapers.org).

### Time frame:

- can always submit even after ICPR,
- not limited to ICPR papers.
